 MACMILLAN

Task 1. You are going to read the text aloud. You have 1.5 minutes to read the text silently, and then be ready to read it aloud. Remember that you will not have more than 2 minutes for reading aloud.

Nowadays solar energy is widely used as an alternative form of power. Solar panels transform the energy from the sun into electricity. The first plane that does not need fuel was constructed in France, in 2015. It uses only the sun's energy. The panels are placed on the huge wings of the plane. It doesn't fly very fast. Solar energy can make the plane move at only 140 miles an hour. However, the plane is able to travel round the world. It is safe and can successfully cross areas of bad weather. In the future, engineers hope to construct a model that people can fly in. Our dream of environmentally friendly transport may come true very soon. Would you like to take a flight on the solar plane?

We are always told that we should clean our teeth regularly to keep them healthy and to have fresh breath. It is believed that people started using a kind of paste to clean their teeth around 5000 years ago. However, the ingredients of these tooth powders were very different from ours. For example, the people of ancient Egypt used salt, mint, dried flowers and pepper to create tooth powder. Later, in the 18th century, in some countries in Europe, people brushed their teeth with burnt bread. The first toothpaste appeared in 1890, in Great Britain. At first it was sold in jars. Then special tubes were designed to make the toothpaste more comfortable to use.

Do you know why it is hot in the summer and cold in the winter? Most people believe that it is because the Earth is closer to the Sun in the summer and farther from it in the winter. But it is not like this at all! In fact, the distance between the Earth and the Sun is largest in July and smallest in January! Scientists suggest that the reason for different summer and winter

Learning foreign

languages. Somebody said: "English is a language that came from nowhere to conquer the world..." These words are really true and I will prove it. Foreign languages are absolutely necessary for us nowadays because of our growing international contacts with all the countries of the world. There are many reasons why we begin the study of a foreign language. One of them is to be able to communicate with other people who use this language. We may be planning to travel in one or two countries where the language is spoken. If we know the language of a foreign country, we can talk to its people and understand what they are saying to us. If we are working in any branch of science, we naturally wish to read scientific books and magazines in other languages. Making business nowadays also means knowing foreign languages because of the growing international business contacts. Knowing foreign languages helps people of different countries to develop mutual friendship and understanding. We can also make our intellectual and cultural horizons wider through contacts with people of another culture. It is also very interesting to read foreign literature in the original. We can also read foreign newspapers and magazines and to understand films in foreign languages without any help. Learning foreign languages is compulsory in all the secondary and higher schools in our country. English is a very popular language. People use it in many parts of the world and there is a lot of business correspondence and literature in English. I think, it is very important to know at least one foreign language — English, German, French, Spanish or any other one. In conclusion I would like to say that now there are more than 60 countries that speak English as the dominant or official language. My purpose is to show you why the English is a world language. The present day world status of English is the result of two factors: the expansion of British colonial power, which peaked towards the end of the 19th century, and the emergence of the US as the leading

My future profession.

The end of school is the start of our independent life and the beginning of the most serious examination we have passed. In order to do well at this examination it is necessary to choose the right road in life which will help us to do our best and to work for the benefit of our country. Many roads will open before us: technical schools, Institutes and universities. Everybody will have a chance to develop and use knowledge and education received during the school years. There are a lot of different trades and professions, and each one must choose the occupation in which he or she can best develop one's own talent and abilities. Our society needs well-educated people. Nowadays the profession of an economist has become one of the most useful, modern and interesting. That is because our country is moving towards market economy and different forms of property are being established. There is a place for an economist at every plant and factory. An economist exercises different functions. He or she can determine the structure of an enterprise and calculate costs as well as probable profits. An economist analyses the condition of the market and prospects for its development in the future. His or her practical use of electronic computers is a must. The activities of an economist at an enterprise range from bookkeeper control the financial state of an enterprise and perform a lot of useful calculations. A manager is an actual administrator. Having a good command of the economic situation in the region and the demands of the market a person with an economist's diploma may establish his own business, or he may become a partner of a joint venture. It is very important for an economist to know a foreign language, especially English. That is because contacts between our country and many countries of the world are becoming wider with every coming day. Every economist has a chance to go abroad or to deal with foreign businessmen coming to our country. But to become a good economist one must work hard and get not only theoretical knowledge but also great

Problems of Youth.

The age between 14 & 17 is considered to be one of the best periods in people's life. Grow-ups remind it with excitement & tenderness. But most teens wouldn't agree with this opinion if they were asked. Youth is the time when a person is trying to find his place in the world. And during this search he or she comes across different problems which are as important as those of the adults. The youth of the 21st century face almost the same problems which were acute to their parents when they were young. These problems are quite serious & they can't be considered trifles. One of them is a generation gap. Every generation is unique in its experience. It has its own ideals and a system of values concerning every aspect of human life. Adults always complain that the young people do not blindly accept the thesis of their parents. Different generations take different directions. Grow-ups always teach the young how to live. But the latter want to live their own life. And it generates the conflict of the generations. Drinking & taking drugs have become the most actual problems of the modern society. As for teenagers, they don't realize the harm it does to their health, they just don't want it to be the privilege of grow-ups but unlike grow-ups they are not able to drink responsibly. They really believe that certain drinks will make them look like they're accepted. So, we can say that the low level of self-appraisal is the main reason of drinking & drug problem. In fact, teenagers have got a lot of work. They're busy with their studies, household chores, some of them have a paid job. But there's no time for fun & they want to be entertained at least sometimes. This excessive work leads to an inner conflict which is usually expressed in the form of an open, direct protest against the world of grow-ups. Our age — is time of making a choice what we will be in future, what we want to do and how. So we have to choose the university to have better education and future profession, if you have a good education you'll be always perfect

Sports.

Sport is probably as old as the humanity itself. It has been developing with the development and growth of the mankind people all over the world. If you want to feel fit you'd better go on for one kind of sport or another. I should admit that everyone must do all he can to be healthy. Good health is better than the best medicine, as the old Latin proverb says. All kinds of physical exercises are very useful to make our bodies strong and to keep ourselves fit and healthy. Sport not only helps people to become strong and to develop physically but also makes them more organized and better disciplined in their daily activities. It makes for a healthy mind. In a healthy body sport helps people to keep in good health. We all need to exercise. Even if you don't plan to make a career in sport you still have to practice. Regular exercises give you more energy. That is why many people should take more exercise than more rest. Exercise makes you feel and look better. The best exercise is one, which is involved, in repeated movements: walking, jogging, and swimming. Bending and stretching will add flexibility and feeling of lightness. As for me I try to take all these things into consideration and as a result of it I go in dancing studio, play badminton and sometimes volleyball, ride bicycle and swim. I think that dancing is better than sport if you just want to keep fit, but not make a sport career. Because sometimes sport is dangerous if you don't know how to do exercises properly. For example, if you run too much your calves can become too big or you even can get injury. So you better go to a sport clubs where experienced instructor will help you to achieve good results. I like to dance very much and I think it's a best way to be healthy and to keep fit for girls. Because dancing develops all groups of muscles and helps to keep good department. Besides it makes one feel confident and helps to overcome shyness. So I am in good form and hope to be in future.

Protection of Environment

is a small world we live in, and it's high time for all of us to realize it. Since ancient times people have been trying to produce more and more to increase their wealth. Nobody noticed that we were destroying Nature by using it as the source of raw materials, and as the garbage can for our waste. Nature seemed to be boundless and endless... Far from it as it turned out. Millions of cars and smoky factories pollute and spoil the air we breathe in. Pollution is hanging over big cities like an ugly brown cloud. It is hurting our lungs as well as the life of animals, birds and plants. People need wood and paper, so we cut down our forests. We don't know what to do with waste materials of our industry, so we pour them into water, bury them into soil, and shoot them into atmosphere. We pollute the water we drink, and the land we live in. People build nuclear power stations and carry out nuclear tests. As a result, radiation represents one of the main problems nowadays. The rapid growth of population in the world may turn into another grave problem very soon. The speed, with which we are using up our non-renewable resources like oil and gas, is appalling. With the development of our civilization we have become dangerous to the planet and to ourselves. What must we do not to find ourselves in a dirty desert in the near future? This question cannot be ignored. Some scientists are pessimistic about our problems. They suppose that we have already reached the point of no return. Others are more optimistic and believe that our ecological problems are solvable because more and more people begin to understand how dangerous they are. There is increasing awareness of people of the real state of the planet. In many countries environmental protection agencies and research centers are set up. Such organizations as "Green Peace" and "Friends of the Earth" try to put pressure upon those governments that do not care for ecology in their countries. The humankind will be able to survive only if we all understand that environmental protection is our universal concern.

My favourite holiday.

Режим имитации: Общие сведения

Процесс сдачи экзамена включает следующие основные этапы:

- 1 Регистрация**
Вам необходимо ввести в систему номер КИМ.
- 2 Ознакомление с инструкцией**
Вам предлагается ознакомиться с инструкцией по выполнению заданий, входящих в состав КИМ.
- 3 Настройка уровня громкости**
Вам необходимо прослушать тестовую запись и указать громкость воспроизведения заданий диктором.
- 4 Проверка регистрационных данных**
Вам необходимо проверить правильность номера КИМ и присвоенного номера варианта КИМ.
- 5 Запись номера КИМ**
Вам необходимо произнести в микрофон номер КИМ и прослушать сделанную запись.
- 6 Активация**
Вам необходимо пригласить организатора для активации экзамена.
- 7 Подготовка и ответ на задания**
Ответ на каждое задание КИМ состоит из подготовки к ответу, во время которого на экране компьютера отображается задание КИМ, и ответа, который записывается на цифровое устройство.
- 8 Прослушивание ответов**
Вам предлагается прослушать записанные ответы, после чего сдача экзамена завершается.

Внимание!

В режиме имитации экзамена Вы можете переходить от подготовки к ответу досрочно по клавише «ПРОБЕЛ»

As soon as spring brings a new growth of bushes and berries, bears start feeding. They eat and eat. All through the spring and summer their feeding goes on. The bears build themselves up. They store food and fats that they will need in the fall when they start their long sleep.

As days grow shorter, and the temperature begins to fall, bears hunt for a sleeping place. It may be a shallow cave, or a deep crack between rocks. Some bears end up sleeping in hollow logs. Logs seem to be bears' favourite places. Bears seem to choose small spaces. They can keep warmer in a cave that's just large enough to hold them than in a larger cave. They often line their sleeping place with leaves and dried grass.

All through their winter naps, bears will not eat. Often they will sleep for 7 months, moving only now and then.

Many lands that had once been swamps were drained or filled in. There are different reasons why people drained swamplands. Some were drained to fight diseases caused by insects that lived in them. Because swamps were considered unpleasant places in which to live and harmful to health, many people thought that unless they were drained the land was worthless. Other swamps were drained to make new land. As the population grew and more land was needed, people drained swamps or filled them to make room for more farms and factories, more roads and airports. Few people thought that it might be harmful to get rid of swamps. As swamps disappeared, other things happened. There were both more floods and more droughts than before. There were also more fires, for swamps had acted as firebreaks. Hunters noticed that there was less wild game. Wild life that once lived in the swamps was dying out, because it had no place to live.

A hobby is an activity you enjoy doing, it is something of your choice, something unique to your taste and talent. A hobby can improve our well-being; it can give more meaning to our life. Just as physical exercise is important for the body, relaxation of the mind is also essential. In fact, studies reveal that people who cultivate themselves through such activities are less likely to suffer from anxieties, depression and other negative feelings. A hobby is the easiest way to restore your balance whenever you are over-worked or stressed. Since it is an activity of your

BAPHAHT 16

Task 1. Imagine that you are preparing a project with your friend. You have found some interesting material for the presentation and you want to read this text to your friend. You have 1.5 minutes to read the text silently, then be ready to read it out aloud. You will not have more than 1.5 minutes to read it.

According to employment experts and economists, there are some popular career choices that will have more opportunities available in the future. These popular career choices include careers in information technology, health care, law, business and entrepreneurship. Within these industries, there are a deluge of different opportunities for career seekers.

The health care industry is a fast-growing sector with many opportunities available to those who would like to take care of sick people in some way. Opportunities are widespread, from being a doctor to being a certified nursing assistant (CNA). Jobs include being a cardiologist, registered nurse, hospital administrator and medical researcher.

There is always a need for business professionals in an industrialized nation. Accountants, managers, entrepreneurs and salespeople are just a few of the opportunities available in the business world. If you like being a part of the distribution and marketing of goods and services, business is a good place to begin exploring career options. Starting your own business can be rewarding, but also challenging. A person can technically start a business with no education, but it is wise to get at least a master of business administration (MBA) to get the necessary skills to make the business a profitable venture.

Task 2. Study the advertisement.

You are considering joining the new language center and now you'd like to get more information. In 1.5 minutes you are to ask five direct questions to find out about the following:

- 1) date of opening
- 2) location
- 3) language courses
- 4) preparation for international exams
- 5) teaching methods

Task 3. Imagine that these are photos from your photo album. Choose one photo to present to your friend.

Photo #1

Photo #2

Photo #3

You will have to start speaking in 1.5 minutes and will speak for not more than 2 minutes (12-15 sentences). In your talk remember to speak about:

- where and when the photo was taken
- what/who is in the photo
- what is happening
- why you keep the photo
- why you decided to show the picture to your friend

**You have to talk continuously, starting with:
"I've chosen photo number ..."**

Task 4. Study the two photographs. In 1.5 minutes be ready to compare and contrast the photographs:

- give a brief description of the photos (action, location)
- say what the pictures have in common
- say in what way the pictures are different
- say which of the activities presented in the pictures you'd prefer
- explain why

You will speak for not more than 2 minutes (12-15 sentences). You have to talk continuously.

You have received a letter from your English-speaking pen-friend Molly who writes:

... Yesterday my mom asked me to look after my little sister and her two friends. Babysitting is tough, don't you think so? What do you usually do if they ask you to look after little kids? Would you like to be the only child in the family, and why?

Oh, I have some great news! I am going to stay with my cousin in New York for a week ...

Write a letter to Molly.

In your letter

- answer her questions
- ask **3 questions** about her cousin

Write **100–140 words**.

Remember the rules of letter writing.

Comment on the following statement.

Digital literacy is the key to success in any occupation.

Science is the first thing to be financed in the modern world.

What is your opinion? Do you agree with this statement?

Write 200–250 words.

Use the following plan:

- make an introduction (state the problem)
- express your personal opinion and give 2–3 reasons for your opinion
- express an opposing opinion and give 1–2 reasons for this opposing opinion
- explain why you do not agree with the opposing opinion
- make a conclusion restating your position
